

## AUBIER

### Designer

Thomas Larbain

### Technical characteristics

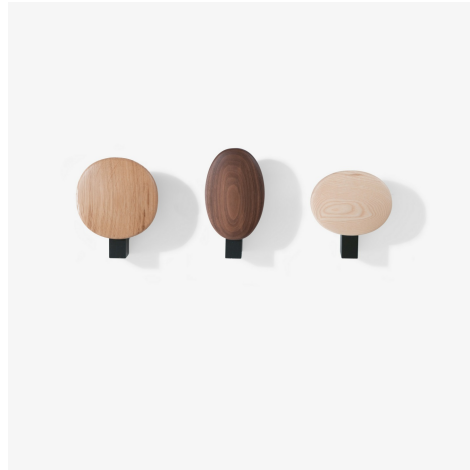

Aubier is a series of wooden wall hooks in various shapes and sizes made only of scrap wood, collected from our cabinet workshops. By combining different tree species in the same object, Aubier creates a kaleidoscope of colours from the same material. Mixing the woods also allows to use all the offcuts from the cabinet production and manufacturing : oak, walnut and ash. The packaging was particularly made with care. The 3 hooks are fixed on a display inside the box. Set of 3 solid wood wall hoods with wall bracket in black-stained ash. The head of the hook is in natural oak for the "square" shape, in American Walnut for the "oval" shape and in natural ash for the "rectangle" shape. Natural varnish finish.

"Square" hook L 10.2 x total H 12.7 x D 4.8 cm / "oval" hook L 7.6 x total H 14.3 x D 4.8 cm / "Rectangle" hook L 10.5 x H 10.9 x D 4.8 cm.
