

AZABU

Designer

Marie C Dorner

Technical characteristics

AZABU is based around the creation of airy shapes in soldered metal wire. This collection, designed by Marie Christine Dorner, is a real 2-in-1: both an occasional table and storage thanks to its removable lid. With its pared-down lines and black lacquered wire structure, this item gives the impression of being light, yet elegant and modern.

Occasional table with structure in black lacquered steel wire, base in black lacquered steel and upper top in black lacquered sheet steel, in a satin finish. The top is removable.
