

WALL- MOUNTED BOOKSHELF WITH GLASS SHELVES BIBLIOTHÈQUE MURALE

Designer

Pierre Guariche

Technical characteristics

An aerial bookcase with 3 shelves, present in the catalogue of the Galerie M.A.I. in 1952, to play with construction/deconstruction. It is composed of bronze lacquered steel wall uprights. The shelf supports are made of brass lacquered steel. The bookcase exists in two versions: shelves in clear, embossed, laminated glass or shelves in stained beech veneered plywood. Lamination techniques : clear, embossed, laminated glass is made of 2 glass plates, with one side ribbed lengthwise, and one smooth side. The 2 plates are superimposed by crossing them, thus giving the appearance of square embossing. This enables a better resistance and the absence of broken glass, which is dangerous in the event of breakage. The shelves are removable by slightly spreading the uprights on the sides.

DIMENSIONS

Height 1,180 mm | Width 765 mm | Depth 220 mm | Weight 17.75 kg
