

SIDEBOARD GUARICHE STAINED ASH GALERIE M.A.I

Designer

Pierre Guariche

Technical characteristics

Included in the catalogue of Guariche creations for the Galerie M.A.I. in 1952, this piece of furniture was designed to be used as a radio – pick up – disco unit. It comprised a flap door in ash and a sliding door in a lacquered perforated metal sheet. The interior layout includes a record storage compartment, a space for the record player and for the radio. A must-have for vinyl lovers. In this re-edited version, the interior layout has been redesigned to optimise use and it is now including a set of removable shelves. The sideboard consists of a flap door in veneered stained ash and a sliding door in a lacquered perforated metal sheet with a structure in stained ash veneered MDF and stained solid ash sides. The base is in stained solid ash.

DIMENSIONS

Height 800 mm | Width 1,800 mm | Depth 450 mm | Weight 80 kg
