OKA

Designer

Kazuko Okamoto

Technical characteristics

Oka is a modular shelving unit composed of single or double niches which may be juxtaposed in a way which jostles with the normally monotonous codes of the shelving unit. Thus one can mix colours and materials (lacquer or veneer), bringing together varying module sizes (single or double width) to create one's very own piece of furniture. The staggered shelves enable modules to perfectly interlock whilst bringing a highly original asymmetrical note to the extremities of the piece. To obtain the overall width of a composition : ADD TOGETHER THE INTERNAL DIMENSIONS OF THE MODULES (361 OR 720) AND THEN ADD 167 mm FOR THE SIDE OVERHANGS OF THE SHELVES.

SINGLE SHELVING UNIT - 1T

Dimensions

Height 2,154 mm
Width 361 mm
Depth 319 mm
Weight 40.3 kg
