

## JUPITER

### Designer

Pierre Guariche

### Technical characteristics

In 1966 Pierre Guariche developed a series of designs around a single block seat with round and welcoming shapes. A seat with a swivelling high back.

Inspired by the conquest of space and

technical innovations, such as the use of expanded polyurethane, in the service of its ideas, the shapes of Jupiter became a reality. Less than a year passed between the submission of the drawing – 24th

October 1966, and its presence in Meurop catalogue, a Belgian company of which he was the artistic director from 1960 to 1968. Its description in one line: “The ultimate luxury armchair”.

**STRUCTURE** Steel wire structure clad with injected polyurethane foam. Clad in polyester quilting 110 g/m<sup>2</sup>. Swivel base in 8mm thick steel, epoxy satin black lacquer. **COMFORT** The interior of the armchair is entirely clad in high resilience polyurethane Bultex foam (38 kg/m<sup>3</sup> – 2,8 kPa). Clad in polyester quilting 110 g/m<sup>2</sup>. The seat cushion is made of high resilience polyurethane Bultex foam (36 kg/m<sup>3</sup> – 2,8 kPa). Clad in polyester quilting 110 g/m<sup>2</sup>. **MAKING-UP** Twin-needle stitching on the back. Cover may be removed by a professional.
