

DOUBLE SHELVING UNIT - 2T OKA

Designer

Kazuko Okamoto

Dimensions

Height 2,154 mm | Width 720 mm | Depth 319 mm |
Weight 74.4 kg

Description

A modular one-piece shelving unit formed from single or double bays (lacquered or veneered) which may be juxtaposed, making it possible to mix both colours and materials and/or widths to bring a touch of originality to what is essentially a highly structured, functional piece. The staggered shelves enable modules to perfectly interlock whilst bringing a highly original asymmetrical note to the extremities of the piece. Units must be joined using the linking kits described below, and must also be fixed to a wall using the wall fixing kit. To obtain the overall width of a composition : ADD TOGETHER THE INTERNAL DIMENSIONS OF THE MODULES (361 OR 720) AND THEN ADD 167 mm FOR THE SIDE OVERHANGS OF THE SHELVES.
