

# LOW TABLE CORSÉ MARBLE SARAGOSSE

## Designer

Alain Gilles

## Technical characteristics

Like a homage to the viaduct, that work of art which runs above a river, inlet or any other obstacle which features height or length, sometimes both, larger than would be necessary to span the river or void to be crossed, Alain Gilles has designed a low table and sofa end table with tops in corsé or verde marble, set into a structure and base in natural varnished black-stained solid ash.

## Dimensions

Height 315 mm | Diameter 1,100 mm | Weight 75 kg
