

OCCASIONAL TABLE SARAGOSSE

Designer

Alain Gilles

Technical characteristics

Like a homage to the viaduct, that work of art which runs above a river, inlet or any other obstacle which features height or length, sometimes both, larger than would be necessary to span the river or void to be crossed, Alain Gilles has designed a low table and sofa end table with tops in corsé or verde marble, set into a structure and base in natural varnished black-stained solid ash.

Dimensions

Height 450 mm | Diameter 420 mm
